2. In the original estimate, the
foundation was proposed to be
excavated to a depth of 1 1/2 feet,
but the experience gained after the
foundation was actually sunk, goes
to show that the soil is loose that
the depth provided in the estimate
was insufficient and that the same
had to be doubled to ensure perfect
solidity of the superstructure to be
raised on it. Besides, the filling up
of the foundation was originally
proposed.
